

Cancer Cure

Where an open sore use
2 ounces of pulverised Calamine
1 " " white-lead
7 " " " Copperas
and enough cotton-seed oil
to make a past. Put this on
rags and apply to the sore
for seven days on the
ninth day it will begin
to loosen around the edges
and pieces will come off
when the cancer is all killed
the surface of the sore will
appear like red rice. then
any good salve can be ap-
plied and the sore will heal
rapidly.

If the cancer is not
an open sore but a large

dark red lumps apply
a paste made of one teaspoon-
ful of honey one tablespoon-
full of thick cream and
enough rye flour to make
a paste that can be spread
on cloths and put on the
swelling. This is a slow
process but in time is
a sure cure.

Gall Stone Remedy

Ammonium Iodid	3 $\overline{\text{iii}}$
Liq. Pot. Ars.	3 $\overline{\text{i}}$
Tr. Calumba	3 $\overline{\text{iv}}$

Sig. 3 $\overline{\text{i}}$ in 3 $\overline{\text{iv}}$ water after meals
and at bed time
